This is United States of America supposedly the land of the free. XM subscribers pay for quality programming and content of this nature. I assure you there's not going to be a mass exodus of listeners from public radio for traffic and weather reports. Subscribers are listening to get away from the repetitive nature and politics of public radio. Traffic and weather reports are an added benefit. FCC, I strongly urge you to not consider this ridiculous petition. This is nothing but an attempt by some good ole boys to keep down something that they are not benefitting from financially.
